Contents

Introduction

Chapter 1 About the universe

1. Mother's heart and the universe
2. Let us ask ourselves about 10 subjects
3. The footsteps of natural catastrophes

Chapter 2 Natural catastrophes

1. Prologue
2. From the different dimension
3. Most obvious message from the universe is the natural catastrophes
4. The natural catastrophes are the energies
5. UFO
6. The measure is one
7. We move through our lives as planned

Chapter 3 Mother Universe

1. Please close your eyes
2. The existence of energy that keeps us alive
3. The universe is one
4. The universe of Tomekichi Taike was Mother Universe
5. Turning the thoughts toward Mother Universe
6. Let us go forward together

Conclusion

Postscript

The selective comments of Ms. Kayo Shiokawa made in “let us meditate together” delivered by the Podcast are added in the text. (It is delivered only in Japanese.)

In the text, you will see the invitation “let us meditate together” in the gothic font at the pivotal points.

They are the comments of author Kayo Shiokawa excerpted from the voiceblog of reading this book (published in 2013) delivered through Podcast. You will see often the words “deep breath” or “meditation on mother.”

If you would like to meditate then, please be careful about the following subjects and close your eyes lightly and think of your mother.

1. Please take deep breaths before the meditation.

Please be comfortable, close your eyes lightly and exhale slowly. Breathe in after the exhalation and keep the air at tanden (about 5cm below the navel) for some seconds and exhale. Please repeat it several times.

How about it? Does your heart become calm?

2. When your heart becomes calm, please turn your thoughts toward your mother who gave you the birth.

Please just think of your mother. It must be good, whoever your mother is.

You had a period stayed in the womb of your mother who gave you the birth. It is the obvious fact that she delivered you.

Please think of your physical mother along with the fact that you were in her womb and were given birth. You were really joyful when you were in her womb. You were also joyful though you were unable to see or hear just after your birth. You were in peace leaving everything to your mother who gave you birth. Please think of you who were infant aged zero and think of your mother in front of you.

Introduction

After the publication of “Along with Mother Universe Part 1” and “Along with Mother Universe Part 2” in 2007, I had bound the part 1 and 2 up and published “Along with Mother Universe” in 2013. After 10 years from 2007, I am pleased to publish the upgraded version of “Along with Mother Universe.” Same as the case of 2013, the book is completed expecting to encounter the unknown people.

I believe, something will reach deep in your heart who read this book.

You will meet the time when something blows up from depth in your heart.

It is not known when but you touch the vibration, energy of this book now.

I just mention now, it will certainly affect your lifestyle in the future.

Please begin “looking within your heart,” learn the truth and move through your true life. I would like you to die with joy.

It is no coincidence that you are there. It is destined. Your environment, the people around you and the affairs to occur, those are all destined.

I hope, even one more person to realize that they are all the messages from “Mother Universe.”

The title of this book “Mother Universe” is not the story far away.

It is not unrealistic. “Mother Universe” is the real homeland for all of us, the homeland in our hearts.

We have various places where we were born and raised, and think of them the homeland. The real place for us the humans to return is only one.

Yes, the place where we have to or want to return is only one.

Naturally, the place does not mean the specific place on the earth.

Then, where is the place?

Though I mention, “actually, we went through the long daunting time in order to search for that place,” there will be only few people agree with me as it is right. I think, it is the reality. It is all right with me. I think, it is meaningful to launch the book out as my heart mentions, since I realized the real place to return, the real homeland where I wanted to return.

Though I mentioned that the place where we have to or want to return is only one, we all have abandoned that place. We have abandoned our real homeland,

only our homeland. It is not exaggeration to say that we have always wandered without knowing the place to return.

We did not have the place to live in peace. Hence, the thoughts resonating in our hearts with the words of homesick or nostalgia are not shallow like you feel now. There is your own voice coming up from the depth in your heart.

It is the voice remaining muted as “want to return, let us return, let us return together.”

Please pay attention to the voice remaining muted. Please awaken to be able to pay attention. Please recover yourself to be able to pick it up one by one. You, also you, don't you seek for your real homeland? I would like to convey through this book, it is not the distant future that the voice remaining muted becomes bigger within you.

You have a physical being now. However you are not your physical body. Please really feel it in your heart. Please really learn it.

Want to return, let us return, let us return together.

Please turn your heart to those voices remaining muted that resonate in your heart.

Chapter 1 About the universe

1. Mother's heart and the universe.

Now I begin to mention specifically.

There was a person who conveyed to us as “All humans have abandoned their homeland.” That person was an old man lived in Osaka Japan with the name of Tomekichi Taike. Since Mr. Tomekichi Taike has retired from the principal position at high school in Osaka, he has held many seminars mainly all over Japan for 30 some years. In those seminars, Mr. Tomekichi Taike has directly indicated the subject, “We, the humans, are the consciousness and energies.” He has earnestly talked to the people attended the seminars to study in the direction to feel and learn, “we the humans are consciousness, vibrations and energies” in the heart of each person through the practice of “looking within the heart in the daily life.”

Mr. Tomekichi Taike has closed his life of 90 years in December 2015.

His thoughts conveyed as his lifework should have reached in the hearts of people attended the seminars.

Mr. Tomekichi Taike proofs his existence as consciousness, vibration and energy, as per his words “we the humans are consciousness, vibrations and energies,” though he no longer has his physical body. It is not only what I feel by myself but must possibly resonate in the hearts of my colleagues studied together for many years through their daily meditations.

Since I explain about him as mentioned above, Mr. Tomekichi Taike may be thought as the person in the position of teacher, leader or founder in the religious expression for the people attended the seminars.

It may be the commonsense understanding that everybody attends the seminars in order to learn from that person.

However, the seminars hosted by Mr. Tomekichi Taike were quite different. The quite different part from the common sense became obvious in those seminars.

That state was looked as deviated from the common sense on the basis of physical forms, but everybody must have understood it when one has repeated the practice of “looking within the heart in daily life” previously-mentioned.

I explain what it means. It will be definitely felt in one's heart that one did not attend the seminars with the tender thoughts to learn from Mr. Tomekichi Taike but was born in order to kill Tomekichi Taike and has attended the seminars.

Naturally, there must not be less people who attend the seminars with their thoughts same as the reliance on outer powers asking to save them from the agony and suffering currently held.

However, those people have disappeared after a while, as they could not obtain the favorable answers in those seminars. Then, they must wander from this religion to that religion now.

Eventually, they thought Mr. Tomekichi Taike as the founder or leader of religion and gathered at the seminars. They had totally wrong motives to gather at the seminars.

Obviously, there are other wrong motives.

Actually, though they attend the seminars continuously without correcting it, it is only hanging on Mr. Tomekichi Taike and is difficult to fulfill the study according to the subject as "we, the humans, are the consciousness and the energy." But it sidetracks, if I talk about it now, I just return to the subject.

There will be some people who do not understand what it means, "one did not attend the seminars with the tender thoughts to learn from Mr. Tomekichi Taike but was born in order to kill Tomekichi Taike and has attended the seminars" previously-mentioned.

It is right. It is never understood in your mind. However, it will be learnt gradually in your heart.

Mr. Tomekichi Taike has held the seminars for 30 some years sincerely with his life risked, in order for you to experience it in your heart.

I have attended the seminars for 20 some years. In those years, I have proved in my heart, "we, the humans, are the consciousness and the energies" that was conveyed by Mr. Tomekichi Taike.

I have studied it both by the experience in the seminars and the incident occurred around me coincidentally.

Meanwhile, I mentioned, "one was born in order to kill Tomekichi Taike", but it does not mean to kill Mr. Tomekichi Taike. It is only the murder.

Please focus your attention on eliminating the conscious world of Tomekichi

Taike instead of Mr. Tomekichi taike.

My real intention is for many people to learn through that sentence in their hearts that the fierce energy swirls in their hearts or in their conscious world without exception.

Otherwise, we cannot return to our only homeland “Mother Universe.”

Everybody must begin to learn in the heart own reality that is covered by the fierce energy created by the ignorance, selfishness and greed.

There is no saint in the world. Everybody must face the reality holding the deep darkness in each heart without exception.

However, it is not easy to achieve. Everybody thinks oneself correct and honorable and lives one's life. Each person has own thoughts and value standard and does not think even in dream, one has lived incorrect life.

Incorrect life does not mean the mistake to be charged and punished.

There are many people thinking that they have lived the ordinary lives honestly. Most people must think so. However, everybody has failed in the true world. There is no body living honestly without learning the truth, “we humans are consciousness, vibrations and energies.”

It is not easy to learn what one has mistaken or why one has mistaken in the world believing that the physical world was real and true.

Hence, there was Mr. Tomekichi Taike to help and were the seminars held.

When we looked within our hearts and attended the seminars, we all were supposed to feel the fierce energy of ignorance, selfishness and greed through the person Mr. Tomekichi Taike.

One's stupidity was supposedly made clear through the person Mr. Tomekichi Taike. It was the main reason why Mr. Tomekichi Taike has held the seminars for a long time of thirty some years in this lifetime.

Naturally, that energy is the energy to destroy everything, as you learn when you feel it in your heart.

We live our daily lives holding those energies.

We, the humans, struggle every day and night in the field of politics, economy, culture, education and others, holding those energies.

Yes, the unaccountable sentence previously-mentioned, “I was born to kill Tomekichi Taike”, means that we were born holding the energies to destroy everything.

Mentioning a little more in detail, it sounds as follows.

If I describe it in words, the energy blown up from my heart, when I saw the person Mr. Tomekichi Taike at the seminar room, it is as follows.

“I kill you. You get out. You are obtrusive.”

“Basters, move out. It is me who kill him. I need nobody’s help. Taike, I kill you.”

“What the universe of Tomekichi Taike is. Whatever you say, it is fiddle-faddle. My universe is far splendid. My power is far larger. Taike, you die.”

Let me get it straight. There was no trouble between me and Mr. Tomekichi Taike. There was nothing like I was suffered by Mr. Tomekichi Taike.

However, I had experienced many times that such thoughts blew up from my heart, when I saw or heard him in the seminar room.

Furthermore, such experiences were shared not only by myself but by many people attended the seminars repeatedly.

Don’t you think, it is the strange phenomenon?

Though Mr. Tomekichi Taike and me or Mr. Tomekichi Taike and somebody else were get involved only through the seminars, why the ugly dark thoughts blew up from our hearts instantly as soon as we saw or heard him?

I wondered and was surprised at it in the beginning.

However in time, I learnt that strange, surprising phenomenon was as “the lid of my hell pot has opened in this lifetime,” then it became no longer unnatural or surprising.

Certainly, that event gave me the impact as the lid of my hell pot has opened widely and it was dragged out in the sun, through the person Tomekichi Taike. In the beginning, it was very frustrating and irritating for me.

Only the frustration as boiling anger blew up from the bottom of my heart.

However, as I think it now, it was the beginning of my track returning to Mother Universe.

Thus, I went through numerous experiences in my heart at the seminars as mentioned, and really learnt in my heart, “I was wrong. I expanded the dark universe.”

Hence, I can mention it clearly.

We hold the fierce energies in our hearts without exception.

As we leave such situations unchecked, the incomprehensible affairs and

accidents occur around the town and also the large scaled disasters will occur. It is not somebody else's affair but is the reflection of our hearts.

It is learnt by looking within the heart or reflecting the world of own thoughts carefully in the daily life. One can learn the fierce thoughts and energy in one's heart and can learn oneself.

Hence, everybody has provided one or two unwelcome or incompatible persons around.

There are the nasty person around you, who troubles you or whose word or attitude irritates you. They help you to blow up the negative energy from your heart.

If that person exists in front of anyone, one's heart responds each time for what that person said or did, and the negative energy blows up endlessly.

However, it is not learnt that the energy blows up from the heart, unless one practices to look within one's heart. Hence, most people just flow the negative energies endlessly. Then, they pretend to be good people.

As the lid of hell pot opened, one's heart met the reality that one has flowed the negative energy. It may be a kind of despair.

However, that despair is not the simple despair. When one is habituated to look within one's heart, it does not end only with despair.

Because, when one learns the fierce energy created by oneself, one feels the warmth or joy to enfold the fierce energy.

Furthermore, one does not feel it from outside, but feel it welling up from oneself. One learns that one's-large, wide, warm and gentle-self enfolds one.

One will feel, it is one who exerts the fierce energy but is also one who exerts the positive energy such as gentle thoughts or warmth.

In other words, it means that one meets one's true self.

Then, one learns naturally something like, "the reason why the human is born," "the reason why the human dies."

When you feel and learn in your heart the reason why you exist here with your physical body now, "mother's heart" indicated as the title in this chapter must resonate in your heart.

As for mother's heart, we bring up the image of motherhood or mother's love that is felt in the process to conceive, deliver and raise the child with good care, since we did not know ourselves as the consciousness and energy but

thought ourselves as the physical bodies.

However, mother's heart mentioned here has a little different atmosphere.

Naturally, mother's heart leads to motherhood or mother's love, but please think, it is large and wide world that is far beyond those or including those.

It has the different scale of largeness, warmth and joy but is not extraordinary world.

Certainly, most people have forgotten it presently but everybody keeps it sleeping at the depth in heart.

I mentioned it in the word of "Mother Universe."

I would like to mention it through this book that "mother's heart" widely encompassing motherhood and mother's love leads to the conscious world and energy of our only one homeland "Mother Universe."

I would like you to prove it in your own heart.

"Mother Universe", yes it is "universe."

What is the universe then? We bring up various images from the word of "universe."

When I thought of the universe, I had the thoughts from ever before that I came to the earth from the planet somewhere.

If we think of it in the three dimensional world, we imagine it like a scene in the sci-fi movie as came flying by the space craft from some hundred million light years away, and may be excited for the unknown universe.

However, what I felt is not something like that but had the feeling as I came beyond the dimension.

For instance, our present world is the three dimensional world with height, width and breadth.

The universe in that sense is different with the universe felt by me.

The universe that I mention and think is not the physical world like the planets in the solar system but the vibrational world.

Yes, the universe is the energy.

My thoughts are for each one of you to feel in your heart that the energies as universe are ourselves, and we are the universe itself.

I would like you to learn that "mother's heart" leads to the universe, the true energy of universe leads to Mother Universe, and they are all one.

I would like to meditate together today also.

Please take a deep breath. We came beyond the dimension.

There is the plan and the flow of consciousness for us to go beyond the dimension.

Please think of yourself existing in the flow of consciousness and think of Mother Universe.

There are a lot of people who are interested in the universe.

There may be a lot of people who like the power of universe.

However, here is the important commitment. It is dangerous to turn your thoughts to universe, while you have forgotten “mother’s heart.”

Please learn, it is most important to feel “mother’s heart.”

Certainly, the vibrational world and energy of universe will have the great influence for us from now on. Hence, it is most important to reawaken to the mother’s warmth within us in the true meaning.

I want you to keep it in your mind, “The universe does not exist far away, but exists within our hearts,” and feel and think of universe in your daily life.

I want you to learn, feeling and thinking of universe is same as feeling and thinking of mother.

Now, I turn my eyes from the universe to our daily life once again.

I feel the following things through the news that I look or hear daily.

How about you?

Everybody has the darkness in the heart. The news that we look or hear daily indicate it. The gruesome, hideous, unbelievable affairs occur one after another.

The people, who call for the solution as it is not forgivable, why they do it that far, whom we have to blame, who is responsible, among the various affairs occurring, do not even think that those are the affairs in their world of hearts. However, it is the reality.

I think, it is not a matter of who or any particular race.

The dark world come out of the person who forgot the important thing, own origin, sometimes becomes various affairs such as, bully, child abuse, kidnapping for ransom, child prostitution, parenticide, prolicide, insurance killing, it’s me fraud, fraudulent sales of spiritual charms, fraudulent

business, bribery, bid-rigging corruption, organ business, patronage dating, mass violence, drug trafficking, drug addiction, and makes noise daily in the general public. However, it continues only for several days and disappears in the public mind, then the public attention is turned to the new affair.

Though it is so for the general public, it remains as the unforgettable memory for the party in charge of the affair or accident.

Even though the victimizer is taken to the court and is sentenced the capital punishment, there remains the root of trouble in the heart of victims.

The victimizer who infringed the human right of victim sometimes claims the human right proudly. Victims must have the mixed feelings.

Even though the case is closed, the party in charge may still keep those feelings.

It must be hard to be cured completely, that the impact given to the heart becomes the large emotional damage.

How about it, though it is settled by the money finally?

Since the thoughts wriggling for money is fierce energy, there is a large possibility to create the new trouble, when they accept the money.

However, it is sadness in the present world, that there is no way but to settle it by the money.

In the daily life, the fierce examination war and economic war continue.

Actually, arms and ammunition fly about, and many human lives become victimized. There is the reality to be exposed in the nuclear threat.

Recently, there is the cyberattack in the internet world.

I think, the fighting energy spreads from a home to the world.

Does the humankind define it as development, progress and prosperity?

The humankind launches the war, in order to build the peaceful, bright world without war. What do you think of this contradiction?

Certainly, people's thoughts are changed by the tide or the transition of times.

The relation with society and each other will become complicated.

They may say, let us respect the position of each other, let us understand and pursue the benefit of each other, let us talk and exert the wisdom for the happiness and prosperity of humankind, are they really true?

Does it really work out well?

In the world, it moves drastically behind the scenes.

The points appeared from the movement behind the scenes, become the

various natural or human phenomena.

That movement has already begun and it becomes the time to go forward.

The world goes into chaos. The things already enter that stage.

Hence, everybody must meet “mother’s heart” sleeping at the depth of each heart. I feel, it will flow to that direction.

In the next chapter, I chose several subjects and mentioned the thoughts came up in my heart, thinking of such trend in the world.

Please ask yourself, what you feel and think of those subjects.

Let us awaken to the truth through our bodies.

Please turn your heart to the thoughts and warmth of mother existing in your heart.

2. Let us ask ourselves about 10 subjects.

(1) About being born?

What is to be born?

You are given birth by your mother and exist there.

You know your mother who were pleased at your birth than anybody else.

Obviously, you were also pleased very much to be born from the womb of your mother.

Everybody had a peaceful time to suck mother’s breast, to be embraced by your mother. Even for the socially respectable person who is proud of having lived on one’s own, it comes down to mother’s hand.

However, most people have forgotten the origin, the origin of themselves.

There may be almost nobody who has forgotten but realizes how much thoughts one has poured out to one’s mother.

Though mother was indicated as the origin, this mother does not mean the mother whom you contact with on a daily basis. Your mother has various habits and silly part as well as you. Most mothers mention, “you are my child, you are my child whom I gave birth and raised,” and exert relentlessly the thoughts to rule and the energy to control.

Naturally, mother does not think, it is the energy to rule and control.

She thinks, “it is for you” and “it is mother’s love,” hence she thinks within

herself, it is good. Actually, it is silly but she does not realize that it is silly. Hence, it is more difficult to deal with.

Otherwise, there is something definitely flowing from mother.

If you really meet the true thoughts of silly mother, you will definitely change. It is the thoughts and vibration of mother who does not assume you as her property but is pleased to bring you into this life and only hopes your happiness.

Though you cursed her out or asked her too much, you have been forgiven and have existed there.

If you really think that you have obtained your status, privilege, property by your challenge and effort, isn't it your great deal of arrogance?

It must be difficult for you to instantly admit your arrogance.

However, I think, someday you will meet yourself who conveys to yourself, "yes, it was, I was arrogant, mother I am sorry."

Then, you will meet the thoughts definitely flowing from your mother and will just weep.

Then, you will realize in your heart the entity of your mother who is not the mother whom you meet on a daily basis, and will feel the vibration of that entity. You will feel the indescribable warmth and peace.

Then, the joy encompassed you unconditionally as your mother's love will spread in your heart.

Please believe first that you were born as supported by such true thoughts of mother. It is the origin of yourself.

There may be the common belief that the child cannot choose the parent in the general public, but it is not true. You have definitely chosen your mother. Rather than you have chosen but you have asked.

You have asked to "please give me birth."

It is because you needed the physical body.

Being given birth by mother means being given the physical body.

Everybody forgets such a thing. It has the probability of 100 percent.

In order to return to that thoughts, various troubles begin as soon as one is born in this life.

Furthermore, since one goes without the origin, one believes the saying that the life is to walk with burden on the shoulder, the life is suffering.

One accepts it without question.

There are many incorrect traditions. I think, this is the worst tradition.

Being born is joyful. The life is joyful.

Everybody rejoices and celebrates the child's birth. Both parent and child confirm each other, the message "Please awaken to your true self through various affairs from now on" by celebrating the child's birth.

However, the true birthday for that person is when one can think, "it is just joyful that I could be born, mother I thank you." Then it is one's starting point. I think now, nothing is realized, unless one stands at that starting point.

Please look within your heart, what you think now about being born.

Please touch your thoughts of thanking your mother that well up from yourself.

(2) We forgot the entity of mother

You have asked to "please give me the physical body" and were supported by the cells with DNAs taken over from your parents and have waited in the mother's womb for being delivered to this life.

Though you were affected variously through the physical cells of your mother in your mother's womb, you have waited joyfully and eagerly the day to be delivered in this life.

Even though the physical cells stopped working before the delivery out of mother's womb or soon after the delivery, you should definitely have flowed the thoughts, "it was good, I am joyful, I thank you." Because, you stayed in your mother's womb even for a while. You had only peaceful, no complained, joyful time and space. Then, you felt yourself encompassed by your mother's warmth. You could feel the entity of your mother.

The fact that the entity of your mother accepted you was unchanged by whether your physical body was delivered to this life or not. As you feel it, though you do not appear with the physical body in this life, you convey to your mother, "mother, I thank you" and disappear with joy from your mother's womb.

It may be the mother's end to sorrow for the miscarriage, the dead born or the death soon after delivery.

Thus we were born, but forget the meaning of birth and the entity of mother as we grow up. Though we try to go through our lives then, it is not possible to go through the lives with ups and downs as we expect.

Actually, ups and downs were in our own plan.

We were supposed to set the way to go through also.

However, we forgot our wish to have our bodies and the environment as we planned, and blame our mothers before us with the thoughts of insufficiency and dissatisfaction, such as “I did not want to be born in such a place,”

“why did you give me birth” or “why my mother is somebody like that.”

As severe as the environment is, the blaming force becomes stronger.

Instead, even though it is the enviable privilege environment, we find some insufficiency and dissatisfaction, and bash those thoughts to our mothers.

Thus, we experience for our thoughts to bounce out directly toward our mothers before us.

“Why do our thoughts come out directly toward our mothers?”

Don’t you wonder it?

Everybody, didn’t you tell your mothers whatever you like, while you were small.

However, your mothers must have accepted you eventually, though you were spoiled and acting like babies. Sometimes, we were harshened or were rebuked, but felt something as different as our fathers did.

We were taught it by nobody but knew somewhere in our hearts that mothers were like those. Yes, it is mother whom connected by the navel string.

As soon as the navel string is disconnected, everybody forget the entity of mother.

(3) The adult who cannot grow up

Don’t you think, there are many top heavy adults who cannot grow up?

Though it is said the adult in a word, it depends on the definition of adult, it may be the lowered level of humans or childish.

Being not able to grow up does not mean remaining innocent like a child, but means the person who is self-centered, selfish, good at asserting oneself but does not commit oneself to the responsibility. Those people work at the

company, marry and become the fathers and mothers.

How does it become in result? I think, it appears as the affairs or misconducts carried on daily, even in a country of Japan presently.

In the world flowing a lot of information, the flow of decreasing birth rate in the society produce more adults who cannot grow up. The heads and bodies grow but the hearts are immature, they are the unbalanced humans.

Those people will be overfull in the world.

The bodies grow naturally as the living environment becomes rich.

The heads are trained through the examination war.

However, how about their hearts? Don't they know what the heart is?

The world of heart is not figured out by the religious scholar or the academic study at all.

The world of heart is also not mentioned from the scientific perspective.

Certainly, it is possible to mention the joyful or sad feelings and may be possible to analyze the feelings psychologically. Though one mentions the feelings, it does not mean to mention the heart, it does also not mean to understand the world of heart by analyzing the feelings.

Because, both one mentioning the feelings and one analyzing the feelings look at the heart from the physical world.

They do not know that the heart exists in the world of heart.

Eventually, they try to understand the world of heart in the mind.

They place importance on things appeared in the forms, such as the word or attitude, try to assume or analyze the world of heart then.

At least, the religious book or tutorial will be made so.

The things overflowing in this world are something like that.

It is the trend in the world to deal with those information stuffed in the head.

However, there are a lot of adults around, who cannot grow up.

It looks for me the trend to make it more confused by giving the unbalanced information to the unbalanced people.

Please close your eyes lightly and feel the conscious world and vibration of your mother, your true mother, who has continuously conveyed the warmth and gentleness to us, instead of your physical mother.

(4) About going to die

What is going to die?

The person born is going to die inevitably. There is no elixir of life.

Everybody will have time for the physical body to fall into decay.

Everybody must understand it.

I think, the point is whether the person has found the thing really to do, or has found one's mission, during the time one was born until one dies.

Even for the person who thinks it is one's mission and pours the passion in the various fields, can one assure it is one's mission?

It may be at the last stage of one's life to happen to think, whether there was anything else besides that work.

When one is young and full blooded, one is given the opportunity to exert one's ability, one is satisfied with the promising fruitful life and is also evaluated well in the society.

Naturally one obtains the certain status, honor, property and reputation.

When that person is dead, they draw the personal profile one or two steps higher and pass one into the legend. Among the people who knew one, one is lionized and is passed into the legend. They will be caught up in the festive mood for the celebration of birthday or some kind of god.

However, it is the matter of currently living people. The shining glory disappears when the person has cast the physical body away or has approached the moment of death. The gorgeous atmosphere is limited in a while one is clad in the physical body. The said person has no time for that. Because one relishes the heavy suffering world that is fairly different with the gorgeous atmosphere in life, as soon as one casts the physical body away. The heavy suffering pressure is looming, though one calls or shouts continually. It is the reality of the person who has existed without realizing the truth, when one had the physical body.

Nobody mentions from the world after death what world one stays in.

Nobody can mention it. Being called to heaven peacefully is outrageous.

Then, is dying suffering? Why is it suffering?

We were born, since we were suffering originally. We were born to save ourselves from the suffering. If we live without knowing that threshold and die, the death must be suffering. The plan to realize the threshold in life for

most people will be derailed, while they are infatuated for the air turbulence in front. They may not intend to be infatuated, but may think, they have gone through to their utmost, but should not realize, “they were born because they were suffering,” “they wanted to release themselves from the suffering.”

Furthermore, most people think, the death means for them to disappear.

All, their loved families, their work and their properties are disappeared then.

Rather than that, they have tremendous fear for them to disappear, as “what will happen after their death.”

Those people can never accept their death with joy.

Hence, the death is nothing else but suffering.

Moreover, the days with physical pain of sickness and waiting for death are nothing but suffering.

They may convince themselves, as “they will soon leave this world,” though thinking in their hearts, “do not want to die, it is scary to die.”

Though they encourage themselves, the time approaches every moment.

The people who have relied upon outer power continuously exert the thoughts to implore or pray for god’s guidance or Buddha’s mercy.

Though the people have usually no relation with god or Buddha, are still suffering in their hearts. It is natural to suffer. Because, those people have been cold for themselves.

Though they do not realize it, have been cold for themselves, if they have not saved themselves from the sufferings but have accumulated the sufferings during the time from their births until deaths.

Their hearts must be filled with regrets and sorrows.

However, it would not be realized by themselves, while they have the physical bodies. Most people would not realize the serious conditions in their hearts, until the moment they die.

Please face your death and yourself after death and look within yourself.

Please look within yourself in the gentle atmosphere.

Please have a time like that.

(5) Our own dead bodies

How do you like your dead body to be treated after your death? Do you like to

be held the magnificent memorial service and be put in the ground cordially? Do you like to be given the final bow before alter and to be memorized forever? After you leave your thoughts from the physical body, flowing the thoughts of “thanks” to the physical cells, when your physical cells finish the role, the material as the physical body remains. I think, the dead body is just the remains. It is the remains without the thoughts dropped out.

The master of remains has already gotten out of physical body and is still alive. I feel, such state is the human’s true nature.

I feel, our true nature is the consciousness, and do not remain in the physical bodies forever, when the physical bodies become unnecessary.

However, the most people hang on the physical bodies.

Because, they think, the physical bodies are themselves.

They think, they cease to exist along with the death of physical bodies.

Hence, they think seriously to be put in the ground cordially, to go to heaven with the guidance of hierarch. They want to be remembered themselves in the past days on the death anniversary.

I feel the gentle, warm feelings of my physical cells while they act.

I believe, we can communicate each other with “thanks”, when my physical cells say “good bye” to me.

I feel to say “good bye, thank you” and leave my physical body immediately.

I do not remain with my dead body.

Though my dead body remains, I exist as the consciousness. I feel, it is myself.

Since it is the state in my heart, I just ask to dispose of my dead body after I separate my thoughts from my physical body.

I just bother it. I think, it does not cost much.

Is it tender hearted and gentle person who feels and keeps the sorrow for parting? What is tender hearted and gentleness?

We may have the deep feelings for a while, because we looked within the hearts each other when one had the physical body.

However, it is not lonesome or sad thoughts but thinking of one with joy.

Please think of it joyfully, if you think of one in the past days.

(6) Transmigration

It was the difficult issue, “Why the human is born, why the human dies.”

However, I understand it in my heart feeling the eternal present that they all are the joyful phenomena.

The birth and death, all, are provided in order to awaken ourselves.

It is tremendous work to awaken ourselves.

It indicates the serious matter that we thought, both birth and death are suffering.

Hence, the past disciplinants thought of the liberation from transmigration.

They believed, the transmigration was suffering and the liberation from suffering was the path toward happiness, then worked hard to cast off their worldly desires. It was outrageous misconception and ignorance.

However, it will not be understood until they begin the turnaround in consciousness. Though they repeat the severe discipline, remain in the hell forever, unless the turnaround in consciousness begins within themselves.

Furthermore, they are bound up to protect their lives, while they struggle with their daily lives. I mention, it will ruin noisily, though they try hard for the happy, wealthy and fruitful lives.

It should have been so in the past lifetimes. There were natural catastrophes in every age. Since we did not achieve the turnaround in consciousness, always died in the oath and grudge.

Since we were born with our conscious world remained unchanged, it was established that both birth and death were suffering.

We try to protect ourselves there. We defend desperately. The thoughts cling to the physical beings, that obsession is awful. We shift the blame to the people around. In fact, we did it in the past lifetimes.

However, whomever we grudged or whatever we damned, we eventually sank down to the depth of darkness. Though we tried to grovel up from the depth of darkness, we let ourselves sink down due to our hearts of grudge and damn. Though we were born in the elegant and gorgeous times, our conscious world was dark. Though one was in power to rule the country or one was simple person living in the shadow at roadside, one's conscious world was totally dark.

It was the numerous transmigrations for dark people to have close relations and show their darkness each other.

Though they have numerous human dramas in their hearts, they were born again. They were given numerous opportunities to awaken themselves.

There may be the people who believe transmigration in the world.

However, they have not realized that their transmigrations are interlinked. Because they exist without the turnaround in consciousness.

Please close your eyes lightly and meditate together.

Your mother exists within your heart.

The consciousness of your mother exists.

Please return into the warmth, into the joy.

Please turn your heart to the consciousness and thoughts of many mothers.

(7) What does linking oneself mean?

Do you know what does linking oneself mean?

For instance, when I turn my thoughts toward my future lifetime, I feel my thoughts, “I leave my physical being in this lifetime, will wear my physical being in the future lifetime and will live together. The form of physical being is just changed but I am unchanged.” I perceive my entity speaking within myself. It is same as my past lifetime. I have such feelings within myself. Hence, I believe myself as the entity continuing from the past to the future.

Let me listen to my thoughts.

“I have linked myself. I have linked in the darkness. I feel it.

Then I had this lifetime. I was born with my extraordinary determination.

I am on the path to be linked to my last physical being.

The present is 250 years from now. 250 years later is the present.

I have such feelings and am joyful.

It is just joyful to be given birth. Both being born and going to die were in order to awaken myself. This awakening was really great change.”

It was the world as “I was happy without anything, I was joyful,” where I have arrived through the suffering and gasping.

I conveyed it to myself as “I am joyful by myself”.

We have linked ourselves without exception.

Our thoughts hoping to meet our true selves link ourselves.

We, who have existed as energy, appear with forms of human beings in order to realize the meeting with our true selves.

We have same contents though we have the different forms in each lifetime.

The energy has the physical body and links the thoughts hoping to meet one's true self.

I learnt it in my heart in this lifetime.

(8) Is it the cancer cell to be hated?

We are supported by the physical cells. The surprising incident occurs for the cells and endangers the physical body. The most dreadful disease is the cancer. One has flowed the energy that kills or damages the cells. It is said so in a word. However it is not limited for the patient with cancer.

It is expected for those people to realize something with the disease of cancer. It is the opportunity for that person and the family around.

However most likely, nobody can accept it like that.

The fear of death and economical issue come into the mind of everybody.

The hateful one is the cancer cell. It drove everybody into confusion.

Hence, the doctor and patient try to break the cancer cell down, as it is solved, if it is removed.

The energy exerted from each heart is fierce, like fighting with the cancer or eliminating the cancer.

I wish them to realize it. The heart to fight with cancer does not have a bit of gentleness for one's own cells that have always accepted one's energy.

It will be refreshed, if the decayed and nonfunctional part is cut off.

The medical technology has drastically progressed.

The medication has been progressed also.

It may be solved for the part to be cut off, but the cancer in the heart is really troublesome.

The message from the cancer cell does not reach the heart fighting with the cancer.

One cannot meet the gentleness flowing out of damaged part to be cut off.

It is not abnormal, if there is a person who turns the heart toward the cells to be cut off, before pleading to save oneself.

It is good enough, even at the last minute for the light of life going out.

The person, who could have the indescribable feelings in one's poor heart that has shut out the gentleness and warmth conveyed, could save oneself then.

The person may feel somewhere in the heart, it is not happiness to live

unnecessarily long. It was what the cancer cell taught.

They must be happy, if the person and the people around could feel the gentle vibration from the cancer cell.

I would like to meditate on the physical cells of each person.

Please take a deep breath and turn your thoughts to your physical cells.

Please listen to the message from your physical cells and feel the vibration.

(9) Bond

What is the bond between husband and wife or the bond in family bound by? The bond means the relationship being hard to break, but it may be broken easily in these days.

I do not want to think so, but it may be fragile than expected.

The husband and wife unbound, the family unbound, those people are living in a house. They do not interfere each other but enjoy their own living environment indulgently.

Such mode of husband and wife or parent and child may be contemporary.

For instance, let us imagine, if the pebble is thrown in such husband and wife or family.

The waves made by the pebble thrown in motivate the hearts of people there. Though they are usually unbound, may try to move closely together at that opportunity, or may get apart further and may move through in unbound state.

They may think again, why this husband is, why this wife is or why this family is, when the pebble was thrown in.

It may be good without the answer found. It may be good, no answer was found. It may be good enough just to think of it.

I live with this husband, I live with this wife and I have such wonderful family. If you think so, when the pebble was thrown in, don't you think, "thanks for the pebble."

"What does the pebble mean?" "What are the waves made by the pebble thrown in?" if one could think of one's life through the husband, wife and family members and could feel the happiness and joy for the present time, one takes a step forward.

Thus, human is supposed to realize something.

If one cannot realize with the pebble, it will become a little larger stone and will continue further.

Then, your thoughts, such as with help of this husband or wife or with help of this family members, fade out in the process, then you may feel the closer bond.

You may begin to feel, “it is not only the husband, wife or family but there may be the closer bond that is never disconnected.”

(10) One time only life

“It is a life living in tears, it is a life living with smile. As long as it is same life, let us live pleasantly, brightly and prosperously.” It may sound logical.

However, though one covers up superficially and lives pleasantly, brightly and prosperously, it will be peeled off in time.

It is a matter in content of pleasant, bright and prosperous life.

Do you lose unless you have fun in one time only life?

Do you try hard to live your one time only life?

Do you live for the moment in one time only life?

In the meanwhile, let us work hard. In the meanwhile, let us do it this way. Then everyday may pass by in the meanwhile.

I could learn that I have linked myself and think that my life is not interrupted but is continuing.

It is my threshold.

When I look at my lifetime on this threshold, feel it is only a part of my time continuing from the past lifetimes to the future lifetimes.

In the case looking at a part bringing whole thing into view and in the case looking at only a part, the thoughts for that part become different.

In the former case, this lifetime is only a part of whole lifetimes but that part is whole and the change of that part affects the whole.

In the latter case, it is the perspective based on one time only life.

It is a lifetime looking at only a part for the person to work hard or just influenced by others.

If you think of the time continuing eternally, you will spend your present time

differently.

Don't you like to think of your past lifetimes and future lifetimes?

Then, please think of your present lifetime.

Certainly, your present lifetime must be important.

You and the people around may be important.

However, don't you feel something else, the existence of your wider world?

"There may be somebody waiting for me."

"There may be somebody who needs me more and is waiting for me."

Don't you feel something like that?

Naturally, it may be difficult for the person who thinks it is one time only life.

Because one's world of thoughts stays there.

One does not know oneself staying in the narrow world with dead end.

Please think of it.

Though it is the gorgeous time, the time is some 80 years.

However, I feel the eternal time.

There is big difference between one feeling it and another not feeling it.

Does one take good care of oneself, thinking it is one time only life?

One does never do it.

One thinks it is one time only life, because one is not responsible for oneself.

I think, one thinking of one time only life cannot take good care of oneself.

What do you think about it?

That is it. I mentioned my thoughts about 10 subjects.

Why don't you summarize your thoughts or feelings about those subjects?

There is one thing to be regarded, while you do it.

It is your basis.

Why do you think so? There must be the basis to think and feel it.

It is important, what you think and feel, simultaneously I want you to pay attention, why you think so.

3. The footsteps of natural catastrophes

Everybody has the perspective based on the wealth of knowledge and own experience. They have various ways of lives. Besides it, I convey to you, there is the change definitely occurring around us.

The people who have not realized it yet, will experience it through their eyes and ears in time.

In a word, it is the footsteps of natural catastrophes.

They will experience it to ruin completely, though how much they try to protect themselves. I already feel the footsteps and sign.

As I mentioned before, the universe will be involved deeply from now on.

It will affect us very much. The universe is not something extraordinary.

I repeat it. The universe is the world of vibration in a word.

It is the vibration, the energy.

The energy does the work. What is the work created by the vibration and energy flowed from the true world of Mother Universe?

It is the call and shake, as “all consciousness, wake up.”

We, the humans, are the energies. The energies have lived with the forms of physical beings on the earth.

Where does that energy come from? What is that origin? We have repeated the numerous transmigrations in order to learn it.

The true world will work “for all consciousness to awaken.”

“Learning own grass roots.”

“Learning own origin.”

It is the present time for us to feel in our hearts and become believable by turning our hearts toward the vibrational world of universe.

“We are the consciousness and energy existing in the continuous time from the eternal past to the eternal future.”

We are in the course to learn it beginning from this lifetime and furthermore.

I wish to convey, the universe will be involved in the course.

It is “the flow of natural catastrophes” to be developed on the earth from now on. I am joyful. Because I feel that we lead ourselves in order to realize our mistakes. It is the solid proof to indicate that we are “love.”

Since we ourselves are “love,” we can lead ourselves firmly.

We have cast “mother’s heart, mother’s warmth” away from our hearts continuously from our past lifetimes. However, the grand plan is provided for us to realize through our own experience that it has been definitely existed.

If there is a transmigration, there are various life dramas. The life is a drama. We could not look at the drama as it was the drama, but have emphasized the drama and have unclearly focus on our lives eventually.

We had a lot of transmigrations failed.

As the drama was only drama, it was the focus of life that we should not emphasize the drama but should emphasize our thoughts or our world of hearts to look at the drama. When the focus is brought to the point, we come to learn the true meaning of life and also the joyful life.

The natural catastrophe is also the drama in the life.

It is the magnificent drama.

What do we learn from that drama? Each one of us will study it from now on.

“Please release yourself” from remaining in the physical world.

How do you accept that call and shake from now on?

“Let us release ourselves.”

Does your heart respond that way?

Can you still not come out of small cellar?

Do you continue to hold the small world and sink in the depth of suffering?

The call and shake will continue repeatedly.

Each hell will continue until one releases oneself. It is the meaning of hell.

Hence, the next chapter will be consisted mainly of the natural catastrophes to awaken the humans.

Please feel the world of gentle and strong vibration flowing from the natural catastrophes.

However, the natural catastrophes are nothing but the fear in the world of hearts that forgot “mother’s heart, mother’s warmth.”

Please determine in this lifetime, as “let us release ourselves from the hell that damned the universe, hated the universe and crazed for the universe.”

Everybody has promised oneself in each heart. Please remember first your promise and fulfil it. I await your determination.

We went against the heart of mother, the warmth of mother.

Let us reawaken the heart of mother, the warmth of mother within us and release ourselves from the hell that we have damned, hated and crazed.

Please turn your thoughts into yourself.

Chapter 2 Natural Catastrophes

1. Prologue

It is the prologue for the humankind. Please feel it well in the time through 250 years from now.

We, the universe, have waited long for the awakening of consciousness that have been born on the earth and have made the various dramas.

We made promise to revive and awaken, though how fierce energy we flowed. Since I made promise, I have my physical body now.

It was the absolute order for each person to learn the conscious world cultivated with each physical being. It was each task.

Hence, the consciousness that could meet with oneself in the heart, who has continuously betrayed oneself in the past lifetimes, must be really happy.

There is the flow to learn it in each world of heart and consciousness from now on. Though how we yell out as the physical world is true, everything will be ruined.

We will experience that everything in front will be vanished away instantly.

Though we escape or hide in anywhere on the earth, cannot avoid it.

The endurance of planet earth may be endangered.

The humankind will meet that kind of impact from now on.

The flow of consciousness will become obvious from this lifetime.

“Certainly, there exists the flow to awaken to the truth.”

It will be indicated by the forms.

I think, this lifetime is the prologue for the humankind in that meaning.

2. From the different dimension

I can convey nothing of truth from three dimensional world as the physical world is true.

I mention it from the dimension as “the consciousness is true, my true nature is the consciousness and energy.”

Hence, I know, it is never understood in your mind. I know it but I have to convey what I have to convey.

Because I think, it is a part of the flow of consciousness.

I normally feel that “word is power.”

The power has both the positive and negative aspects.

I naturally flow the words with positive power.

However, in order to feel the words mentioned here as positive power in each heart, each person must accumulate the fundamental work as “looking within own heart.” I do not want you to take only the words and end up with the play in words. Please learn, it is not possible to understand it in the mind.

I went through the absolute experience in my heart in this lifetime.

It has not gone through my physical being and mind but that impact has also reached in my heart and consciousness.

Naturally, each word has the power. Because it is the word backed up and mentioned by the absolute experience in my heart.

However, I conveyed simultaneously, it requires the considerable preparation each other in order to feel it.

If you take my word in priority to your brain and refuse it flatly, as “there should never be such a foolish thing,” I cannot help it.

I can only mention to look at your thoughts within your heart.

It is your matter, if you implement it or not.

What I mention here must be easily agreed in your heart, if you implement it and turn your heart humbly.

Because, “I am you, you are me and one world” is our truly existing world.

Please determine it by yourself, how you will exist from now on.

However, your choice and determination will definitely return to yourself.

Please accept the returned result gracefully by yourself.

Please do not escape from yourself, do not throw your responsibility to others but meet yourself majestically. I think, it is the proper path as the human.

Meanwhile, I feel within me, the present physical being is not only myself.

The present physical being is important. I think, it is important within the meaning of physical being that was necessary in order to meet my true self.

Nobody could meet one’s true self, unless one was given the physical being, was given birth by one’s mother.

It was the first condition to have the physical being.

I felt it keenly when I reflect this lifetime and my own heart.

The true world is absolutely not seen from three dimensional world, but it was necessary for us to go through three dimensional world.

One can learn one's cultivated conscious world and energy through one's forms of physical beings.

It was most easily understood to learn oneself who became the dark energy.

There were worldly matters in order to learn ourselves.

They were all provided by ourselves.

We wanted to return to only one true world of "Mother Universe" and have provided everything by ourselves.

We have provided the plan to awaken ourselves by the energy of natural catastrophes as the last measure.

The thoughts existing at the bottom were as follows,

"We want to meet our true selves."

"We want to return to joyful and warm universe."

I only communicate a step faster to please remember it, to please reawaken that heart.

The humankind has worn each physical being, has spread the universe as I am the first in each heart and has eventually forgotten what humble is.

We bind ourselves by the moral, ethic, custom, habit, discipline, rule and others, and are almost in the state of no freedom.

Though we set the legitimate reason for the path toward the happiness as human, eventually we wanted and pursued the happiness and prosperity only for ourselves. It was the history of humankind in the past.

We are originally free. It is absolute fact that our original existence of the human is distorted largely by the law to protect our lives and properties.

Naturally, it is wrong for the people to kill each other at the war.

Why they can kill the people though they hold the justice up.

However actually, they kill the people impassively under the name of justice.

Then, what is the justice? Eventually, all humans have lost the truth. In that state of humankind, "the revival measure is only the natural catastrophes."

It will be mentioned by many people through their experience and situation around from now on.

It will be necessary for the humankind to meet the harsh situations to lose everything in front, in order to consider the root cause of own mistakes.

"There is something to exist, though we lose everything."

The numerous natural catastrophes will occur on the earth, until we reach there.

Please remember. Please reawaken your heart. In order to do it, you have to look at firmly your thoughts of seeking outer source of power and physical being as true. Please look within your heart firmly.

3. Most obvious message from the universe is the natural catastrophes

The flow of natural catastrophe is never avoided to go through.

Because the consciousness has been awakened by the meeting with the vibration of Mother Universe.

The natural catastrophes are caused by the universe within us.

Hence, the more our inner selves are awakened, the stronger calling becomes.

The awakening is joy.

The universe is waiting for the signal of departure in the joyful whirlpool.

For the example as how large the joy is, it may be expressed as large as the energy changes the tilt of earth's axis.

It goes far beyond the bounds of human's knowledge.

There is no way but to give everything up and leave it to oneself.

Even though I mentioned to leave it to oneself, it does not mean to leave it to oneself with the present physical form. It is never possible.

The physical beings are equally stupid.

Since the physical beings are the forms, the forms will be disappeared in time.

It is not possible to leave it to anything to disappear.

Otherwise, when one releases the thoughts from the disappearing form and learns in the heart that one still exists with dignity, one, whom being able to entrust, will spread widely within oneself.

The natural catastrophes may be assimilated in the spread.

It is the moment for everybody to become one and to go beyond the dimension.

We go beyond the dimension together with the universe, with joy, and with natural catastrophes.

4. The natural catastrophes are the energies

In general, the natural catastrophes are assumed as the natural disasters.

Earthquake, typhoon, hurricane, flood, tidal wave, drought, heavy snow,

tornado and others, they all threaten our lives.

They take the living environment away, claim the human lives and force the inconvenient lives. There is nothing good for us.

Especially recently, the natural disasters never experienced in the past, such as record heavy rain, snow and heat wave, also occur in the country of Japan. However, not many people will care what it means.

As the earthquakes occur frequently, they do not make the noise over the small quakes anymore.

They deal with it as there is the earthquake again somewhere today.

“The record number”, “something unthinkable occur”, “they occur frequently”, those indicate us the certain direction.

I think, they are the preamble of coming natural catastrophes.

The natural catastrophes occur from now on.

In Japan and also all over the world, the sign already appears, but it is only “the sign”, the energy of natural catastrophe is nothing like that.

Hence, I think, the issue is, “how we feel the energy of natural catastrophes.”

As mentioned before, the natural catastrophes take our lives and properties away.

How our hearts accept the natural catastrophes that take away without mercy?

The person (consciousness) who does not realize the truth will damn the natural catastrophes.

They damn heaven, damn god or fear as meeting wrath of god.

In fact, we have repeatedly lost our lives and our loved families.

Though we think, the physical world is true, how can we think of “the natural catastrophes as love?”

Everybody thinks hopefully not to meet the natural catastrophes but move through the life peacefully.

Though everybody heard as “the natural catastrophes are love,” the real intention is that “does not want to meet the natural catastrophes.”

Meanwhile, in the country of Japan also, the research is proceeded in the various fields envisioning the various natural disasters.

Every preparation is made based on the past data. The emergency drill in each area is also provided. If the disaster occurs somewhere, the self-defense forces and voluntary bodies rush in and work for the restoration, and also the

public donations and goods are delivered from all over the country.

Naturally the reconstruction of utilities such as electricity, gas, water line and road will be made as soon as possible. The encouraging phone calls and mails will be delivered and the specialists' cooperation is expected for the mental health care after disaster. Thus at present, there are things for the humans to be able to do and it is restored almost the original state in time.

However, if they are caused here and there, one after another in a short time, what will happen?

Though someone waits for the rescue, they may not come in time as one expects. In the meantime the second and third disasters are caused and one may be forced to be watched helplessly and be left for the fate.

It will happen often to be regretted for the earlier rescue.

There may be the case, the certain wide area is ruined completely and becomes the ghost town instantly.

Certainly, the country of Japan has restored from the miserable state after the war. Then in time, the middle class awareness of all Japanese people is changed to the significant economic disparities.

The wealthy people become wealthier but the number of poor people is soaring. In and out of the country, the various issues are mounting.

In that present state, we share the peaceful time so far.

However, what will be the fate of this country with the natural catastrophes occurring from now on?

Is the national recovery of Japan possible from the challenges of many natural catastrophes, as well as the recovery from the ruins after the war?

It is very hard.

However, the survived people must manage to live.

They lose everything instantly and their hearts are ripped apart.

What do they have to do, though they are in the state of peace-addicted?

They have to look at their hell while they are alive.

Their hearts will be depressed to the end that their hearts ripped apart will never be recovered by the slow mental care.

The human beings never face themselves unless they force themselves to the extreme state.

Will they learn in the extreme state of this lifetime their stupidity that they did not face themselves but have sought the invisible world outward, such as god, Buddha or power of universe?

It is the background of script provided by themselves to meet the natural catastrophes. Yes, the script to meet the natural catastrophes were provided by themselves. Hence it does not help though they damn heaven or grudge god. That was what we did not know at all.

One plays the script provided by oneself.

One conveys the message to oneself through the stage of playing own work.

“Let us return to joy.”

“Let us return to warmth.”

And, one will receive the messages from one’s true self.

“Please return to Mother Universe.”

The natural catastrophes that is nothing good for one’s false self is the necessary phenomena to meet one’s true self.

It is said that the energy flowing out of the natural catastrophe is the energy of love to awaken oneself.

You are at the important fork, whether or not you reawaken yourself.

Let us meditate together at last. Please close your eyes lightly and take a deep breath.

Let us return to the joy, return to the warmth. Please return to Mother Universe. Please turn your thoughts to it.

5. UFO

The humankind will have the unprecedented experience from now.

The existence of UFO will be greatly involved.

UFO is interested among the sci-fi enthusiast or around them at present, but it is thought as something in the movie or fiction widely in the public.

However, I would like to firmly mention that UFO does exist.

However, it does not mean “UFO=alien.”

The idea of “UFO=alien” is literally the story in the movie or fiction.

UFO mentioned here is not something like that.

UFO to be conveyed by us could be led to the wrong comprehension from the idea of alien.

Hence, it expands the world of imagination in each speculation, such as UFO kidnaps the human, attacks the earth or contrarily ask for the friendship. It tends to arouse interest unnecessarily.

Meanwhile, have you ever seen or heard of the word, mystery circle?

It is the phenomenon as the spikes in the grain field are brought down to the circle and they are looked like the geometrical pattern. There appears UFO definitely and introduced with “?” like “is it worked by UFO?”

UFO is also introduced in the picture as paranormal phenomenon or unnatural phenomenon, since it is unidentified flying object.

Hence, I turned my consciousness toward those phenomena or pictures.

I turn my heart toward the consciousness of UFO.

Probably, the consciousness of UFO will mention what I feel in my heart.

As mentioned before, UFO exists in the world of consciousness.

UFO does not have the form. Since it is the alien as the human from the idea of “UFO= alien,” it is natural for UFO to become the idea with some forms same as us the humans.

Hence, there must be the people imagining the world like the sci-fi movie as the alien instead of global mankind flew on the spaceship and left the strange phenomenon with geometrical pattern on the ground.

However, I can mention, it is naturally occurred.

There must be also the factitive case.

There does not exist so called alien. There does not exist alien like one in the movie. Hence, the phenomenon appeared there, the geometrical pattern was looked as if it was resulted by the natural phenomenon or was the case of the artifact by the people who shot it.

Anyway, it is not possible that so called alien flew on the spaceship, left something like that on the earth, like the sci-fi movie.

Since UFO does not have the form, it is not possible to leave something with the form. However, strange form is left there, as it is introduced by the picture. It must be spontaneously arising or factitive thing.

So called UFO is not involved in it but something factitive by the human and the natural phenomena are overlapped and created it.

It is natural to think that way.

Actually, it is not a matter but it is important for you not to be confused by

those images or pictures but to look within your heart that conceives of UFO, and feel it.

UFO is the reflection of your heart. UFO does exist.

However, UFO having the form of physical being same as the humankind does not exist. Please hold that point firmly.

UFO is the consciousness and energy.

UFO is the consciousness and energy having no form of physical being.

There is a part in your heart to be connected with that consciousness and energy. You can talk gently to that consciousness and energy by looking at that part firmly in your heart. That growth in your heart is really important. If you turn your thoughts only by interest, such as someone looked at UFO or what the strange phenomenon is, your inner self is not changed and does not learn anything.

The conscious world of UFO, such as suffering, sadness, loneliness, wondering heart, is never unrelated to you at present. Hence, please be you who can accept those things firmly. What UFOs are hoping is for you to call them to make the warmth within you and UFOs unified and return together.

Turning your heart inward. You turn your heart inward instead of outward and call UFO within you. It is really important.

I repeat it. UFO exists definitely in the vibrational world.

They do not have the forms. They do not have the forms like the humankind. However, the UFOs, the consciousness wandering in the universe will communicate with the hearts of humankind from now on.

There must be the people who heard of the story in the past, such as receiving the vibration, the message from the universe or communicating with the universe. However, it is the question, whether they understood the communication as the vibration.

That content may be interested, but that vibration may be something inflating the fear or the vibration to obey the power of universe as I am the first.

That world of vibration expands the thoughts to prostrate before the universe, as “universe is great, the power of universe is amazing” in the hearts of people who turned their thoughts.

Especially, if the people who do not know to look within their hearts turn their thoughts toward UFO, most of people fall for it. Prostrating themselves before the power of universe, they show themselves off. Because, the universe as I

am the first already exists within themselves exactly conforms to it.
The thoughts as “the universe received in my heart is really god” will use one’s physical being. That vibration is just the dark power.
Because, the warmth and gentleness as mother’s vibration is not felt there.
However, once one fell for it, it is hardly realized.
Hence, it is hard for the person who sought for the power of universe.
It is very hard to release oneself from that influence.
Mostly one has the strong desire for recognition.
The thoughts utilizing UFO to show oneself off flows at the bottom.
As the desire for recognition is strong, one cannot feel the true thoughts of UFO, though one thought, it is communicated by UFO.
Because the desire to know UFO more is stronger than the gentleness to accept UFO. Then, one cannot contact with the heart of UFO.
Do you know what it is, hoping to communicate with UFO though refusing to accept it in the heart?
It is cold to oneself. Do you understand it? It is most important point.
The consciousness of UFO wandering in the universe is connected with the heart of everybody. However, most of people do not realize it.
It is obvious what will happen, if one turns the thoughts toward UFO, though one neglects it. If one turns the thoughts by greed or out of curiosity, though one refuse to accept it, one will be just crazed.
The factor to be crazed has already existed within, instead of UFO making one crazed. Namely, it is the proof that one is not gentle to oneself.
It is very dangerous to turn the thoughts without reawakening to mother’s vibration in the heart. However, the consciousness wandering in the universe waits desperately to be accepted. Hence, the communication will often be made with the hearts of humankind from now on.
UFO is not extraordinary but will become ordinary in our daily lives.
It is suffering, unless we prepare to accept it in our hearts.
The more we turn our thoughts to them, the more we must suffer.
Within that meaning, the unaccountable state will occur suddenly in the coming times.
The person behaving strange will appear. It is impossible to clarify the cause.
It is different, if one is gentle enough to listen to the heart of UFO though.

I want to confirm again. UFO has no form, but is the vibration, thoughts and

energy.

**Please close your eyes lightly, as we would turn our thoughts toward UFO.
Please take a deep breath. Please turn your heart to your mother and confirm
in your heart, whether you can simply call your mother and turn your
thoughts to UFO.**

6. The measure is one

For the humankind, only those measures are left, such as

“Save us by ourselves.”

“Convey the truth to ourselves.”

The people (consciousness) who cannot save themselves staying in hell forever. Being unable to save means the state being unable to convey the truth to themselves.

Since they do not know of their true nature, what entities they are, they cannot convey the truth to themselves.

Even though they go to extremes of luxury, while they wear the physical beings, they stay in hell, if they do not know what entities they are.

Since they have physical beings and are intoxicated in that world, they are in the numb state. When they remove their physical beings, feel their state clearly, since their numb state becomes weaker.

The insensitive hearts while they have the physical beings will become sensitive when they die.

Then the heaviness covers themselves and they are stuck in the hardened state. They realize themselves suffering, tied up and struggling.

They feel, those are definitely themselves.

The consciousness that lost the truth is in that kind of state.

Unless they save themselves, they are in the hell while they live and also after they die. It is only different, whether they have physical beings or not.

It is regrettable, there are a lot of measures to beguile the suffering hearts when they have the physical beings. Hence, most people do not realize their true sufferings while they have the physical beings.

Even the person who appeals suffering, it is rare that the person meets the true suffering. Because most people do not know to look within their hearts.

They just appeal suffering and ask for help, or try to escape from there. They do not know at all, it does not help though they ask for help or try to escape to somewhere from that state.

I have no intention to arouse fear. As you look within your heart firmly, yourself in that state comes up clearly in your heart. Hence, how thankful the present time when you have the physical being is, what great love being given birth by your mother was, those thoughts must resonate in your heart.

What you have to do will be seen clearly.

Then the state of suffering will be changed.

You will see a faint glimmer of hope, though you are suffering.

However it is the case, you learn to look within your heart and practice it.

Most people are not in that state.

Though you feel, it was yourself who was suffering and ask for help now, you do not know what you have to do then.

That voice will become larger day by day.

However, the dumb physical being is busily engaged with physical happiness and joy as usual and will meet the death in time.

That cycle will become shorter little by little from now on.

One whistles the warning to oneself and calls for the natural catastrophes within and without. It is the last minute. In fact, it reaches the limit.

Can't you sense the imminent thoughts or sign yet?

However, you do not need to hurry. You do not need to lose your confidence.

You feel easy, calm and do not forget but continue to look within your heart, then you will be able to address directly the various phenomena occurring from now on and also at the critical moment.

It is most awful and suffering to lose oneself.

Most people do not lose themselves but do not know themselves at all.

What will happen, if they are covered by the wave of natural catastrophe suddenly one day? Probably, they will be taken in the whirlpool of wave, and not only the physical lives but also their conscious world will be taken far away in the whirlpool.

There will appear some people who will study to tune the heart's pointer at that moment, anyway the opportunity to "save one by oneself" and "convey the truth to oneself" was provided equally for everybody and will be so in

future.

When can one exploit the opportunity? Or, will one continue to suffer at the depth in hell?

I convey, it is the message from one's true world to make the option by oneself.

It may be the case one is swept up and away and sunk in the muddy water.

Now let us meditate together.

Please close your eyes lightly and take a deep breath. Please think of your time after death.

7. We move through our lives as planned

The life is drawn and worked out by oneself.

One works for the message to be conveyed to oneself in the plan.

“Live for your true self.”

This message comes up, if all the modified parts are eliminated.

“Is that right? Then, this and that also make sense.”

There will be many people who feel it reflecting their backward.

On the other hand, there are still many people who cannot accept it, as “I never provide this kind of script.”

It must be “why I choose the suffering life by myself, if I draw and work it out by myself, I should make it more pleasant.”

The aspect for each life is separated depend on what one feels joyful or happy for. Furthermore, the direction of each life is decided depend on whether one thinks oneself as the physical being or consciousness.

Eventually, it is “what the suffering life is, what the pleasant life is, they all may be thought on the basis of physical forms.”

If one thinks oneself as the consciousness, heart and energy, one must think that everything to occur in the life is the opportunity to learn oneself, and all the suffering and pleasure become joyful.

Meanwhile, I mentioned, the natural catastrophes are in the script written by oneself. The natural catastrophe means the natural disaster in general, one or two catastrophes may be provided in the life of everybody from the meaning of “suddenly one day.”

Actually, it will be the affair to occur as calculated instead of occurring suddenly one day or by great surprise.

It is not possible to assume by our physical brains, in what situation that affair is pulled out. I think, it is sure to be planned for oneself to think and realize something through that affair.

When one does not know to look within the heart or to turn one's thoughts within oneself, one will not think that awakening is joyful and that joy releases oneself since it is joy.

"Let us relish in the hearts the joy to jump out of the small frame made by ourselves."

Didn't we provide our lives with such a wish?

It is difficult to understand it but I answer, "yes, it is."

I felt sorry to myself pushed into the small frame.

Whereas I felt, it was really stupid to live as physical being, I also felt the elaborateness in the conscious world through the script of my life drawn and worked out by myself.

I had to think of it great.

I think, it is most important point, how we move through the time given by ourselves in the physical world.

Is it really the desired way of living to live safely influenced by the public?

I do not mean to "live reversely" but isn't it important to have the attitude to always return to our original selves and look at our entities and everything from that eye level?

I think, we have to cultivate that original eye level through a trial and error process during the time we have the physical beings. It is very difficult.

Hence, it is provided for everybody, the plan to change the eye level when we encounter the natural catastrophe "suddenly one day" through the trial and error process.

Changing eye level leads to the complete change of one's life philosophy.

The natural catastrophe brings that kind of impact to oneself.

It is the natural catastrophe, because one can think, one was wrong through the natural catastrophe to be encountered "suddenly one day."

Unless one realizes that one has made something wrong, though one does not know what it was, it could not become the natural catastrophe for that person,

though it was physically the natural catastrophe.

One will provide the script of natural catastrophe again, if one has the thoughts within to change in the next lifetime.

Everything will be planned by one's conscious world.

Now, in the next chapter, I would like to mention turning our thoughts together toward the universe.

Please be a person to accept that thoughts and energy firmly in the heart.

Mother Universe waits for you.

Let us return to our homeland in heart, Mother Universe and love.

Now please turn your heart to love, homeland in your heart and Mother Universe.

Chapter 3 Mother Universe

1. Please close your eyes

Do you know joy to spend the time thinking of nothing but closing your eyes? The human turns the antenna around and tries to receive the information in all waking hours. One's heart turns always outward.

It may be the proof of living. One's heart turns busily.

It may be rather difficult to spend the time "without imagining anything" or "without thinking anything" for the human who is habituated to act imagining something or thinking something.

One always imagines or thinks of some kind of arrangement.

Though it looks lower productivity to spend the time "without imagining anything" or "without thinking anything," one will feel that the work of meditation to close the eyes and five senses and turn the thoughts toward the true world has higher productivity than anything else, when the turnaround in consciousness proceeds within oneself.

The higher productivity means that it flows the energy to work positively.

As you tune the pointer firmly and turn your thoughts toward the truth, the negative energy cultivated by yourself will be mixed with the energy coming from the true world and will turn to positive energy.

It does work while one sits there.

It supposedly becomes pretty high productivity.

How many things did we produce and what quality of things did we produce, moving our bodies and hearts busily like a house mouse?

We, who thought, the visible world is all, must be prompted for reflection.

When we meet the energy to completely ruin the things that the humans have built so far, no matter whether it is tangible or intangible, will awaken for the first time.

Then the humans may imagine and think of something in the true sense.

That ruin will be enormous. Everything will be ruined.

They will feel, the superficial half measure does not work at all.

Then they will learn in time, they can do nothing.

It means, they can do nothing as the humans with the physical beings.

Meanwhile, they will learn, there exists the power to keep the physical beings alive.

They will feel the hidden power in their hearts as they had the physical forms in order to realize the existence of that power.

What is the origin of that power? It is learnt naturally that they can learn it only when they take the physical beings off.

It is awaited to go through the process to close the eyes, close the five senses and meet the true selves.

Now please close your eyes and take a deep breath.

We have asked for the wrong power.

Please touch your thoughts in heart that have asked for the power outward.

I thank you.

2. The existence of energy that keeps us alive

There is the religious expression, “we are kept alive and are forgiven.”

That expression was used in this study also.

However, it is quite different depending on the world in heart of the person who hears those words, what one is kept alive and is forgiven by.

I understand in my heart that I am kept alive and forgiven by myself.

I realize the existence of energy to keep me alive.

I, the physical being, know the existence of “myself.”
I feel, “myself” will not disappear, though I disappear. Because I am the energy.
I am kept alive and forgiven by that energy.
I also feel that am pleased to exist not to disturb the work of “myself.”
I feel that my joy is joy of “myself,” my happiness is happiness of “myself.”
I am not alone. I exist always with “myself.”
“Myself” knows from the corner to the corner and to the depth in my heart.
“Myself” welcomes me, no matter how much I am awkward.
There is no partner like that.
In my lifetimes, I sought numerous partners and partnered with.
All of them were failed.
Though how strong the bond was made, eventually I experienced, it was betrayed each other.
Naturally, the partners mentioned here were not only the humans with physical beings.
My heart sought for numerous partners including god, Buddha, the power of universe in the religious world.
Finally in this lifetime, I reached the conclusion that my partner is only “myself.”
“Myself” was the energy that keeps me alive. Yes, I was “myself”.

Meanwhile, have you ever really thought, “It was good to be given birth by your mother?”
Have you ever felt in your daily life the energy to keep you alive?
If you meet the energy to keep you alive, your perspective and value standard will be totally changed.
Naturally, the standard of happiness and joy will be changed.
The appearance is not changed but the inner self is changed.
Because I learn the world to be looked both by my eyes and by eyes of “myself.”
It will be confused for some time, but the confusion continues only for a while, since it is naturally understood that the world looked from the eyes of “myself” is the true world.
Then the true world will dominate the area in the heart.
The value standard within myself will be replaced one after another.
During the time that work is proceeded, it will reach the conclusion that my partner is “myself.”

It will be learnt, “myself” was mother and Mother Universe.
For the heart that has learnt the true happiness, joy and peace, it will be definitely felt how flimsy those things of physical beings are.
The physical beings seek the warmth of humans due to the longing for people. They cling on as “want to cure my heart, want to be embraced by warmth, please give me gentle words and treat me gently.”
They seek for help, saving and power.
However, they will learn, all of those were wrong.
I have nothing but the appreciation to “myself,” when I think that “myself” has conveyed to me the wrongness for existing without learning “myself.”
I have learnt through the physical being of Mr. Tomekichi Taike that “myself” did not betray or abandon me, though I have betrayed “myself.”
“Myself” conveyed to me that the physical being of Mr. Tomekichi Taike was inevitable existence for me within that meaning.

Now let us meditate together at last.

Please close your eyes and take a deep breath.

How much do you believe in the existence of energy that keeps you alive and my true nature? Please meditate.

3. The universe is one

We have created the universe within us respectively.
We made our own law and have existed based on it. Since it is law, we are right in all aspects. Our own law is prioritized than anything else.
In the small family, local society, widely between the races or nations, they insist their own statuses with their shield of law.
While the interest corresponds, it works out peacefully, but once the balance is broken, it comes to the battle. It is natural. Both parties are not reconciled but are in the power game each other. Occasionally, they attack the opponent completely in accordance with their law.
We have repeated those things for a long time.
Since it had been a long time, it was the fact that we could not believe it instantly, though we were conveyed that the universe was one.
Contrarily, how much we have resisted it, as our universe was great.

I have learnt first in this lifetime that everybody is given birth with attitude to completely resist the ruin of own world cultivated.

I learnt that I cannot realize the true universe without ruining the root of my thoughts. It was natural for us to continuously suffer and craze, since we did not know it at all.

It is the real state of most people at this moment that they do not realize themselves resisting completely or the law created for their own, but spread the universe as we are the first, and flow the dark energies.

Certainly, they spend their daily lives, holding the background as I am the first. They exist with battle energy stored in their hearts.

They do not look within their hearts but think of the world of physical forms true and seek the happiness and wish the prosperity in that world.

They talk about their lives eventful or happy though it was ordinary, but their thoughts do not really reach the background of their lives with that level.

It may be proper to express it, as their thoughts do not reach the universe in the background of their lives.

Then, what is the universe in the background of life? It is your conscious world.

I think, it is equally failure, though whatever the life is, unless one learns the universe in the background or one's conscious world.

However, it must be not easy for each person to admit one's life failed.

Because, it means to deny oneself.

However, it is worthwhile to be born, if the conscious world in the background is changed.

The change in the conscious world means to realize that "we, the universe, were one".

Though I convey it, it is still less common, as well as the expression of "the universe as I am the first" or "the darkness".

It will be dismissed with laugh, as how the universe in the background connects to my current life.

However, I convey it out loud,

"We were the universe",

"Our universe was one".

I convey it continuously that we were kept alive and accepted in that universe.

It is my joy. Many universes will gather.

Because I realized it by myself through my physical being in this lifetime, what a pleasure it is to continuously exist even with suffering and heaving to respond to my desperate thoughts wishing to meet the true world.

Do you have a courage to get out of the small world?

Please look within your heart.

Now please turn your thoughts to your universe and call for Mother Universe in your heart after a while.

4. The universe of Tomekichi Taike was Mother Universe

From now, I would like to mention the universe of Tomekichi Taike feeling in my heart as of the present time.

I think, there is no doubt for me to understand in my heart the universe of Tomekichi Taike, that is, Mother Universe, though I do not understand everything in my heart.

Meanwhile, in order to mention the universe of Tomekichi Taike, I have to enter from confirming the universe, that is, the energy cultivated by myself. Hence, I would like to mention a little bit about “the demonstration pulling out darkness” performed in the past seminars.

As I mentioned in “1. Mother’s heart and the universe” of chapter 1,

I have challenged the universe of Tomekichi Taike to fight directly.

I have learnt through the seminars that it was my conscious world in the past. Since 12 or 13 years ago from now, I learnt that the universe within me strongly rebelled against the conscious world spreading through the physical being of Tomekichi Taike.

I also learnt that I was given birth in this lifetime in order to learn it and to change the universe within me.

Obviously, there existed the strong will wishing to return to “Mother Universe, my homeland.”

However from the beginning, it was difficult for the vibrational world emitted from Mr. Tomekichi Taike to accord with something I expected within me.

It was not easy for me to accept the universe of Tomekichi Taike, in contrast with my strong thoughts wishing to return to Mother Universe.

Because there was the thoughts within me that I have reigned.
I thought, it is unavoidable for me that accepting the universe of Tomekichi Taike leads to my defeat. Because I have existed in the conscious world that has repeatedly fight out to gain the victory and to rule the universe.
The world that I have existed was the world of “an eye for an eye, a tooth for a tooth” and the world to conquer by the force for the force.
It was the world, as the power is all.
I was given birth by my mother in this lifetime with the background of that kind of consciousness.
I met Mr. Tomekichi Taike as planned. We met at the best place of seminar.
My thoughts within had to dash on with joy, but I, wearing the physical being, became stuck or impatient sometimes for my thick physical being and have spent the time.
It was hard for my thoughts within to burst through the physical being and come out straight. I had a time to be depressed for the thick shell of my physical being but could become to think “no, I am preparing carefully.”
My inner self might know that the considerable preparation is required to accept the blowing energy like magma by myself, though my physical being did not know it. The time required for that preparation was well provided.

Later on, one time, my energy within bounced out toward Mr. Tomekichi Taike one after another.

The energy, once bounced out, headed toward on and on like it knows nowhere to stay.

Though how many times I fell down by the finger of Mr. Tomekichi Taike, I did not flinch with my thoughts of “never give up” and stabbed the fighting sword to Mr. Tomekichi Taike.

One time my mother fell down by the finger of Mr. Tomekichi Taike and was looked like could not get up, I shouted to my mother unconsciously.

“What are you doing? You pitiful, why can you do nothing?”

“Attack him.”

I heard it from my mother later on, that I was irritated for my miserable mother.

Through such “demonstrations pulling out darkness” at the seminars, I learnt my world cultivated by myself. Simultaneously, I learnt gradually the conscious world of Mr. Tomekichi Taike.

I thought first, the consciousness of Mr. Tomekichi Taike will fight back with his fighting energy. I assumed so. However, it was not right.

Contrarily though I sharpened my claws, bared my fangs, stared at him and gave him the verbal abuse, I had no chance to be against him at all.

I was frustrated and irritated for it.

“Why does such a world exist?”

“Why don’t you fight back? Why do you look at impassively?”

“Why..., why..., why...”

I felt many times for my strength faded away for something felt through the physical being of Mr. Tomekichi Taike. It was the feeling like being absorbed by something large. It can be expressed as being embraced.

It was strange. Though I bare my fighting energy, it was strange, why my opponent does not fight back.

Contrarily, those thoughts returned to me.

“I have waited for you, have waited for a long time.”

“I love you, though how much you rebel me.”

I could not believe it at all.

“Damn, I blow your cover, I hate you, I kill you, you die.”

I cursed at him as much as I could. That thoughts came up in my heart one after another. I think, I had awful eyes.

Even though Mr. Tomekichi Taike was silent, I could not hide my embarrassment, because something flowing from his heart was exactly same as mother’s thoughts.

I felt many times, the world of Mr. Tomekichi Taike standing silently was conveyed to the depth in my conscious world.

That thoughts has burst through the thick shell of my physical being and has spread my unphysical world.

When I, wearing physical being, faced myself without physical being, the world of Mr. Tomekichi Taike has permeated into my heart.

That is it. I reflected the time for demonstration at the seminar in good old days, I go back to the subject of mother universe now.

Through those experience in my heart, I finally learnt, the universe of Tomekichi Taike perfectly conforms to Mother Universe.

I learnt, my inner self changes gradually in accordance with it.

I became able to look at directly the eyes of Mr. Tomekichi Taike that I thought cool and penetrating, and hated.

When I looked at his eyes, I was overwhelmed by emotions.

“I have denied myself. I drove myself out.”

I learnt, I just refused the call from Mother Universe. I repented of it.

“Come back to Mother Universe.”

“Yes, I will.”

Through the simple communication in the world of heart, my path to go through has definitely appeared.

Finally I became to answer “yes” in my heart. It was not explained by reason.

Because, I really felt “mother’s heart, mother’s warmth” in my heart.

The universe, that heart, that thoughts, that energy, they indicated clearly how many mistakes I have repeated.

Both my thoughts toward Mother Universe and the thoughts from Mother Universe, have finally realized the meeting within myself in this lifetime.

Because of that meeting, my inner self have rapidly changed.

I felt clearly, physical being is nothing more than physical being, though it covers up well, and naturally became to adjust it within, how I associate with the physical being and physical life.

I stick to nothing, grab at nothing and get nothing involved.

However, I learnt how to enjoy my physical life as the physical being.

It was the daily basis to learn, there was no happiness and joy for me in the physical world.

I also learnt “the humans will definitely return.”

I feel, the humankind who lost the truth will definitely find the place to return by themselves.

Certainly, though we, the humankind, are still stupid, we have chosen to relentlessly show the stupid nature up.

I think, it is because the thoughts wishing to return to our true selves still exists within ourselves.

Mother Universe may be in the vibrational world that still does not resonate in the hearts of most people.

However, I convey, that world of vibration does exist.

As the proof to awaken to the true world of consciousness, the energy stored in each heart will blow out and will appear in the forms instantly.

Through those forms, the awakening of consciousness will permeate into each heart.

It is so called the flow of consciousness.

Because there is the flow of consciousness, the pus existing in our hearts will appear tangibly and will return in our hearts.

We have used our mind in the past, how to handle the form of pus.

Then, it has created the thicker pus.

Instead, we have to encourage ourselves to look at the pus returned within our hearts. Naturally, our hearts will experience the various shock through the forms. There are the expressions such as becoming half crazed or heart broken, but the human's heart is not weak like that. The owner of delicate heart like glass working should never be born with the physical being. Everybody must learn carefully that they have stored really fierce energy in their hearts.

We cannot avoid the complication. The pus in the heart, the darkness will be gouged out.

Because, the vibration of Mother Universe will lead to it.

The person with sensitive heart like glass working will not be born with the physical being.

Everybody must learn that one has stored the really fierce energy in the heart.

We have been born as we were totally dark. Please turn your heart to your true self who waits for your dark self in your heart.

5. Turning the thoughts toward Mother Universe

"I am joyful when I think of universe now. I am happy when I think of universe. I remember mother's arms. I feel, I can return into that warmth. I can return to the warmth, though I have accumulated many mistakes. Because the warmth is myself. I feel, I am forgiven to exist. I feel the world of vibration definitely existing."

It is the thoughts come up in my heart when I meditate.

My journey has begun looking at "love" and "death."

I have accumulated the daunting time in my heart.

It resonates strongly in my heart. How many mistakes I have made.
How many times I have crazed. They all remain as memory in my heart.
I surely learnt the gentleness and warmth of people.
I may be moved to emotion. However, I cannot stay there.
I can no longer close the lid on the darkness sleeping in the depth of my heart.
I can no longer look away from the darkness in my heart.
“I wish to meet the true gentleness and warmth.”
The shout in my heart will become stronger in time.
It will be led by the flow of consciousness and will definitely become so.
Then I will learn, it is required to fully open the lid of hell pot, in order to
meet the true gentleness and warmth instead of superficial gentleness and
warmth.
As a matter of fact, everybody waits to open the lid. It is good, if we open it by
ourselves but we become coward when we have the physical beings.
We press ourselves into the small world and seek the happiness in the small
world.
How sad it is. How pitiful it is.
Originally we are widely spreading universe. It is impossible to feel
boundlessly spreading universe, if we stay in the small world.
We have to begin to open the lid of hell pot and release all energies pressed
in.
It is impossible to meet the true selves, when the dirty things are pressed in.
“Isn’t it good, if the dirty things come up to the surface? Why do you think so?
How long do you chase your shadow of clean and beautiful self?”
Please ask it to yourself.
Your false self will answer it but your true self will also respond to that
question.
Which voice do you listen to and turn your heart to?
It will decide your future lives.

Now, let us turn our hearts toward Mother Universe together.

Please close your eyes, one, two..... please begin the deep breath.
Please close your five senses, calmly breathe and blow until your heart calms
down.
Can’t you hear the melody of good old homeland in your heart?

It is the call from your gentle mother.
“I wait for you to return. I wait forever.”

Please believe, it leads you along with the melody of homeland.
I can listen to igo, the non-lingual sound, from the bottom of my heart.
Igo, the non-lingual sound, is not Japanese, English or any language.
It may, so to say, be the language in universe.
Igo, the non-lingual sound, is the vibrational world with nostalgic sound for me. I get into the rhythm of igo, the non-lingual sound.
My heart spreads widely.
The universe, I expressed it so.
I feel, I exist in the arms of Mother Universe. I am just joyful.
I feel my good old, joyful homeland, the universe in my heart.
It wells up in my heart as joy and happiness now.

Our current physical beings will be vanished away in time. The things with forms in front, such as our physical selves, physical families, physical job and others are vanished away and appear again, then are vanished away again. However, our world of heart that looks at and feels it do not disappear. It is a time for that world of heart to respond in our hearts when we turn our thoughts toward. It is the world spreading there, if we reach our hands. Please feel and meet that world even a little bit and move through with your physical beings in this lifetime.
The message from Mother Universe conveys with firm vibration what will happen in future. It conveys the path for us to go through from now on. It conveys with severity as “I believe and wait for you to return without fail.” It is ourselves to decide the outcome in future.
I have felt, it was myself to keep me alive or bring to death.
The rule in the conscious world is never bended.
I come to learn it through the physical being in this lifetime.
We cannot break the rule in the conscious world, because we are “love.”
We exist on the basis of law.
That law is not tight at all. It does not bind ourselves.

The law is love, the law is gentleness and the law is warmth.

Please close your eyes and take deep breaths for one, two, three times.
Please close your five senses, breathe in and out until your heart calms down.
Please turn and tune your heart's pointer to Tomekichi Taike in your heart.

6. Let us go forward together

You may laugh about the story of future lifetime in 250 years or UFO, as it is something incredible. We cannot find the believable materials to proof it.

It is more realistic to mention the economy from now, the future with low birth rate and longevity, or nearer at hand, what our meal tonight is.

However, you will never think so, if you have both the naked eyes and mental eyes.

It is certainly the reality, the world to see through your naked eyes. However, it is far beyond the reality of the world to feel through the mental eyes.

Presently, how to books along with the daily life are highly valued but the time not to be able to deal with it is coming closer. The time to think that the information sought outward is useless and is not worth a bean will come soon.

It is the state for you to shout "it is not what I want to know."

You have the various agony or suffering in your circumstances, but I would like to convey, it is not something like the affairs you will meet from now on.

The surprising incidents mount up from within and without.

Your heart (consciousness) will experience the impact like your body blew up to the pieces. The impact shooting through your body will be something that you have to change the direction of your life until then.

The impact experienced through your eyes, ears and whole body will be something beyond your imagination.

Unless something like that is experienced, the thoughts or consciousness of humans will not be changed.

Based on that experience, each person will choose by oneself the direction after that and will carry through immediately.

Your conscious world is the chief executive, whether you go beyond the dimension with us or not. Each determination is required.

What will encourage you with your strong will?

I think, it is most important to look at it within yourself.

All depend on your existence in future, turning your serious thoughts toward

the feelings and response in your heart.

Why don't you think of your future seriously and widely, since your physical being was given by your mother?

It is good for you to rejoice your physical self and play your active role in the physical life including your work and home.

However, it may become regrettable life, if that is only it.

I hope you to meet the profound world, instead of temporary pleasure, joy or reason for living.

The person believed in money will be betrayed by money in time.

How about your loved one?

Before it, do you believe in yourself?

I think, nobody can love the person without believing in oneself.

Even though how lovely thoughts you had, it will be resulted to betray your loved one and also yourself, while you look at yourself and other person as the physical being. Because that love is the shadow to be vanished away in time.

It does not help, though you sorrow, repent or grudge the shadow to be vanished away. The persistent thoughts will increase suffering.

Instead, let us change the viewpoint.

Isn't the colleague to walk with you yourself?

Don't you think, it leads to your happiness and joy to realize the existence of consciousness that believes the thoughts "you are me, I am you" in your heart?

Your mother's consciousness, that has given numerous births to you, must have always conveyed it to you.

You were the person who repeatedly throw the message "please aware of my existence" out to the drain. Please learn it through your experience.

I have accepted by myself the result of the repeated numerous transmigrations. Then, I made the turnaround in this lifetime.

Hence, I feel, all of stupidity, pitifulness, suffering and sorrow are natural when we have the physical beings.

I realize, it is natural but it solves nothing nor things proceed.

I feel in my heart, we cannot escape from the hell, though we do anything, unless we break away from our physical beings.

I want you to concentrate on releasing yourself from the hell.

Because, I feel your voice in the depth of hell, "I want to go forward together."

However, nothing can help you without the change in consciousness of

yourself.

Still I will call on the consciousness from now on.

Because the meeting of “my thoughts toward Mother Universe” and “the thoughts from Mother Universe” has been realized within me in this lifetime. I insert “my thoughts toward Mother Universe” and “the thoughts from Mother Universe” as follows. Please use them as your reference.

My thoughts toward Mother Universe

We have repeated the numerous transmigrations on the earth also in order to return to you. We are the consciousness having wandered in the universe, having sought you from boundless past, if the time before the earth is added. We, casted you from our hearts away, have spread the dark universe within us. How much happiness and joy have we sought?

They all have ended with failure.

We have grudged you, damned you.

“Why did you abandon us? Why did you let us down?”

Shouting in the depth of heart, “I wish to return to you”, we have held the shout back. It was a long time. It was a long and suffering time.

Our colleagues are still sinking in the depth of suffering without knowing truth. This lifetime was given to us in that state.

We are never the specially chosen entities, but are the consciousness that have strongly hoped in the heart to meet the true vibrational world, have chosen each physical being and environment, and have promised to gather at the study.

Furthermore, we have given this lifetime to ourselves, since we have hopelessly fallen down to the hell.

Though some colleagues gathered at the study in this lifetime do not still realize it, but we definitely had firm promises with ourselves.

It is the opportunity for all consciousness that were given birth by mother and were born in this lifetime.

However, it is just a handful of consciousness that can gather at the study and have opportunity to meet the true vibrational world.

Hence, I have just rejoiced it and have studied, though there were some people who spread the thoughts as we were special.

I learnt joy to just go on my path.

Looking at my heart, feeling my energy, I nod many times within myself as it

was really so.

When I close my eyes and think of universe, there is the vibrational world resonating firmly. Though I do not close my eyes, I am joyful just to think of. I normally feel, I hold many thoughts from the past, my past lifetimes in my heart and I have my physical being now.

I feel, I am the collective entity of consciousness.

Every one of them conveys joy to me.

“Finally, we can return to mother,” they rejoice to return together.

“We were not suffering, it was us who abandoned mother, mother has always conveyed to us,” they all tell me so.

“Mother, I thank you,” for the joyful thoughts welling up from the bottom of my heart, I have felt something beyond description, how happy and joyful I am now.

Within that meaning, the physical being in this lifetime has the happiest time and space.

Mother, I will look within my heart more and will provide steadily to return to Mother Universe. It was my joy. It was my happiness.

Our universe waits for us with joy.

I just appreciate it for the physical being of Mr. Tomekichi Taike who conveyed it to us. I only have the thoughts of thanks.

I learnt finally by the meeting with you, that my universe is joyful and it is one with the joyful universe.

It was vibrational world. I feel it firmly, how happy entity I was, when I accept the vibration from universe in my heart, spread it in my heart and turn my thoughts toward the universe.

The thoughts from Mother Universe

Thank you, thank you, thank you for turning your heart to me.

I have believed in you. I have always believed and waited for you.

The universe will change from now. Please accept my thoughts with joy.

Let us spread joy together.

We are one. Please continue to think of your mother.

Only one person in this life, who conveyed truth to you, was your mother who gave you birth. Please learn that nothing is realized, nothing is changed, unless you meet the true thoughts of your mother.

When you look around from now on, it will appeal strongly how stupid it is, the consciousness believing that the physical being is true.

Please tune your heart's pointer toward me and only think of Mother Universe. Naturally, your heart will receive the various vibrations.

You will be caught by them, if you do not learn to tune your heart's pointer and the vibration of Mother Universe.

However you do not worry anything. The warm spreading vibrational world felt in your heart will enfold them widely.

I have asked to learn it to the people gathered at the study.

I conveyed many times, "It is all in your world, whether you save yourself or not, it is the conscious world."

Something left is only the practice.

As you may know, the time of 250 years from now is turbulent time.

We will go through the turbulent time that the humankind has never experienced yet.

Then, it comes to the meeting again in 250 years from now.

I am joyful and cannot wait. It is my joy to feel joy together.

I want to spread joy together with many people as possible in 250 years from now.

Please be born with joy and die with joy.

Please ask yourself, turning your thoughts toward your mother in each time of life, why you are born and are going to die.

Your mother will definitely convey to you.

"Return to mother, it is your happiness, please believe to be able to return to your joy, I wait for you, I wait for you forever."

I send it to you now from Mother Universe.

"My joy is your joy. Your joy is my joy. I always wait in your heart.

I wait forever for you to respond to me."

I convey, it will go to the direction that the thoughts transmitted toward the universe and the thoughts transmitted from the universe will go forward together from now on. I convey it with the message as natural catastrophes.

The message of Mother Universe will be transmitted more from now on.

As I mentioned before, since I learn the existence of "myself," I go through the time with my physical being in this lifetime calmly with "myself" and wait for

250 years from now.

My life drama along with “myself” to spread with my physical being in 250 years from now will be spectacular.

I will transmit in 250 years from now toward whole universe that Mother Universe waits for us. I require my physical being for it.

I base on the planet earth and transmit from there.

I feel, UFOs come flying.

I also feel to go beyond the dimension together with UFOs.

“Oh, Mother Universe, we go beyond three dimensions toward fourth dimensions together with you.”

The world sought for long time becomes clear gradually in my heart.

“I wished to return to here.”

I feel now clearly, that thoughts have always lead me and will lead me from now on.

I feel, the energy to make the humankind to realize and awaken flows out from the universe more.

I repeat it.

The universe does not exist far away.

The universe is the world existing in our hearts.

From that world now, the energy is emitted more and more.

It will be experienced on the earth that the energy, the origin of great power, the origin of great warmth, is the universe itself and ourselves.

It is only expected to have the current time with good care and love yourself much, as the human, the consciousness that was given birth.

Please close your eyes. Please take a deep breath and recover your breath.

My joy is your joy and your joy is my joy.

I always wait for you in your heart.

I wait for you to respond to me forever.

Please turn your heart to this thoughts.

Conclusion

As mentioned at the beginning of this book, Mother Universe is only one

homeland where we have to return.

That homeland has existed within us. There was the world of true joy and warmth within us. I mentioned through this book to awaken to it and we are in the flow to resume our true selves.

Let me reconfirm, the universe is not the world far away from us.

“The universe is us, ourselves. The universe is consciousness and energy.

The universe is the consciousness and energy within us.

Namely, the universe is us, ourselves.”

I hope you to feel it in your heart, learn it in your heart.

It is my earnest thoughts.

Please learn it as soon as possible in your heart that you are also in the flow of consciousness toward the dimensional migration, and go forward to release the dark world to the naturally warm and joyful world. Let us change in this lifetime, though we have always been wrong. Let us go forward together.

Please read this book and also “The Wind in Universe-Do we humans end when we die?” that was published as enlarged and reprinted edition in September 2017.

Please feel in your heart the flow of consciousness that conveys the dimensional migration to you.

I would recommend you to read the book “Magnetic field and Turnover”, the last book of a trilogy “The person Tomekichi Taike, the world of Tomekichi Taike”, which was published between 2010 and 2012.

I appreciate it, if you read it.

I mentioned a little bit about the world of “universe” in that book.

As the people who read “magnetic field and turnover” published last year must know, we, actually all consciousness, exist in the positive energy of magnetic field, that is invisible though.

Feeling and accepting that energy in our hearts, we turn over the negative thoughts come up in our hearts in the daily lives. It is the greatest and only one task for us, the humans. However, it is not that way in the real society.

The world is the limited world. You might hear and learn the word of magnetic field and turnover but it is learnt only in the limited world.

There are rare people who experience to meet in their hearts, how great and powerful the original energy of magnetic field and turnover is.

Presently, it is the reality that most people spend the time in their lives

fluctuating between joy and despair in front.

However, we hold the sad reality as we cast our true selves away.

It is undoubted fact.

However, nobody mentioned it in the past. Nobody could not mention it.

Because, the global mankind did not realize the truth in the past.

Obviously, they did not know that they cast themselves away.

I mentioned in my book “magnetic field and turnover”, it is totally different, if you grab the magnetic field and turnover in the limited world.

I mentioned, it is our true lives of humans to feel the true energy of the magnetic field in our hearts and turn our inner selves over, that is, to meet the true love within us, our true selves.

“We have always produced the negative energies, though there exist only positive energies.”

“We spent the tremendous time without thinking it negative or without realizing it negative.”

I would like to continuously mention strongly also in this book, even a person more must begin to realize it in their hearts.

Though I expressed it as the true love within us, we have repeated the big mistakes for that love especially. We did not know what love is.

“The energy of love exists within us.” “We are love by ourselves.”

We have cast love away and believed in the different love, though our universe was love itself.” I would like to mention it also in this book.

Returning to Mother Universe together means returning to love, our homeland.

Certainly, when we look at the history of humankind, there remains the trace of honored person preaching love or the person of love everywhere.

It must be mentioned so in the history.

Then, what energy is that love preached there? What vibration is it?

How about the energy and vibration flowing out of the person called person of love?

It may be trivial matter for the people living in the limited world, what the energy or the vibration is.

They may accept it, hearing the words mentioned or looking at something extended there.

There are many cases, once it was taught in the school or somewhere as this was it, it was conveyed to the later generation, though it might be or might not be true. We may believe it all, what was conveyed as it might be true. Nobody had the judgement criteria of the energy or vibration flowing there in the past.

However, everything exists in the conscious world including us, the humans. The true nature of us, the humans, is not visible.

Hence, everything must be based on it.

It does not make sense, unless looking at and judging the things on the basis of the invisible conscious world as the true world.

The vibration, energy flowing there are the matters, rather than the words mentioned or the attitude extended.

It is more important, whether we can judge it positive or negative in our hearts.

We could learn specifically through Mr. Tomekichi Taike in this lifetime, it is most important, whether the vibration and energy are positive or negative.

The future time of us, the humans, who did not know ourselves, misunderstood ourselves, will flow to realize and correct the direction within ourselves. Naturally, the phenomena encouraging to realize and correct it will occur one after another.

Furthermore, that scale will be continuously enlarged.

Let us go through the path toward Mother Universe.

Please place your track on this path.

You can see the path through the practice for the magnetic field and turnover by Tomekichi Taike. It is required to practice the magnetic field and turnover that leads to returning to Mother Universe.

We are the consciousness returning to Mother Universe. We are the group of consciousness that have promised firmly to return to Mother Universe.

However, we are not the special group. Obviously such groups exist among the consciousness that do not have the physical beings like we do now.

The consciousness that have the physical beings on the earth currently, the consciousness that will have the physical beings in the time of future transmigrations, those consciousness have also promised to return to Mother Universe.

How to lead those consciousness to the original path along with Mother

Universe, it is connected to the phenomena of natural catastrophes to be developed in the space including the earth in 250 to 300 years from now.

Through those phenomena, the large impact definitely waits for the consciousness existing still far away from the truth.

“We return to Mother Universe, we return,” that call will come up in the heart of everybody.

We have the physical bodies on the earth now. However, do you know, how many consciousness without bodies exist in the space?

Please be yourself to be able to turn your thoughts toward the universe, the consciousness communicating within you.

They do not threaten, disturb or craze you.

They are the consciousness suffering, agonizing, dark and crying within you. Yes, they are also yourselves. They are the consciousness wandering in the space, without knowing where they return to and what they are.

Please turn your heart to those consciousness and convey to them firmly to return together.

It is your current role to convey to them with gentleness and warmth felt in your heart, “you can return to mother’s warmth,” “you can return to Mother Universe.”

Please begin it from the person learnt in the heart.

There must be some people who have experienced to turn their heart’s pointers toward the magnetic field of Tomekich Taike, have practiced the turnover and have changed the negative energies such as crazed consciousness, dark consciousness and fierce energy to the positive energies, warmth and gentleness, and have felt the indescribable joy and gentleness conveyed.

Let us convey it to all consciousness wandering in the space that doing it is the path toward Mother Universe.

Please call on continuously to go through the path toward Mother Universe together with us.

We have to continuously call on, regardless we have the physical beings or not. It is so originally. Because, we are the consciousness, energies.

It has been a long time for us to have the physical bodies on the earth.

There are also the consciousness who do not have the physical bodies.

Please work to go on the path to return together.

I think, I mentioned somewhere that the time you have your physical being in this lifetime is not only your time.

Please accept it humbly and feel it in your heart as soon as possible that there are many consciousness wishing to return together within you.

We look forward eagerly for that day.

I think of love and Mother Universe.

Mother, I thank you. Though I repeated the transmigrations on the earth so many times, I continuously spent a lot of time that did not fit in your thoughts. I am sorry for it.

We are called on to return to Mother Universe through our physical beings in this lifetime. We are very joyful now. Did we have such a wonderful time?

It is really like a dream.

However, we were conveyed as the consciousness definitely promised to return. We were given birth by our mothers and now receive in our hearts the calls to return to Mother Universe.

The consciousness of Tomekichi Taike mentions.

“You were love. Your true selves were love. Let us return into love. It is the path returning to our homeland, Mother Universe. Path returning to mother, path returning to love. All of us are one. We are the consciousness to convey it.” Thus, the message from Tomekichi Taike is delivered.

We were really joyful consciousness. I am joyful, really joyful.

We were conveyed to look within our hearts. It was all to look within the heart.

We feel joy to tune our heart's pointers now.

We have always turned our heart's pointers toward the wrong direction.

Though we are the consciousness that have continuously produced the numerous dark universes, it is joyful to finally turn our hearts toward the direction conveying us that we are the bright, warm and spreading world and can convey our joy returning to Mother Universe. We thank you.

We will return to mother's arms. We will return together with a lot of universes. We will go through the joyful path definitely.

It is the time of 250 to 300 years returning to joy. Joy expands joy. Joy leads

joy, we will turn toward the direction to be led, and will exist for the coming 250 to 300 years and forever. We thank you.

Then I would like to meditate together with you at last.

Please close your eyes lightly and take a deep breath.

Do you love your universe very much?

What kinds of thoughts come up, when you think of the universe?

Is it fear? Unrest? Anger? Dark thoughts?

Or is it joyful energy that loves continuously?

Please think of your universe.

Postscript

I thank you for reading to the end. When I think of Mother Universe, I think of the planet earth which served as our home and where I have repeated my numerous transmigrations. Hence, I would like to insert the thoughts of planet earth where was our place of learning and also the thoughts of meteorite fallen on the earth, and close this book.

Lovely earth

I think of the earth where we live now. The earth is the consciousness.

I feel the gentle consciousness. The earth has been continuously conveying the gentleness. The consciousness exists in Mother Universe.

The one of them has appeared with the form, it is the earth.

We have provided it for a long time to look at ourselves with the physical bodies on the earth. The thoughts as “the earth, really thank you” well up, when I turn my thoughts toward the earth.

It is the gentleness of earth that has accepted the energies flowed by us.

How fierce energies we have existed with on the earth.

However, only the gentleness returns from the earth. It is the warmth.

It has given us the awakening and the encouraging.

Now, I think of the earth in Mother Universe. The earth responds me.

We will return the energy to you, the energy that you have flowed to us.

However, what we return to you is just joy.

We return to you the energy with joy that you have flowed.
Please feel it in your heart. Please accept our thoughts.
We return it to you as the form of natural catastrophe.
We exist in Mother Universe. We will have one heart with the universe and
will flow the joyful energy as the natural catastrophe.
The consciousness that have the physical bodies on the earth, please accept
the joyful energy as the natural catastrophe.
And, please realize it. Please realize your true self.
It is the time in 250 to 300 years from now.
Please accept the consciousness of earth in your heart firmly.
We are the joy, the joyful consciousness in Mother Universe.

Now, I heard the thoughts of earth.
The energy gathers heading toward the earth from the universe far away.
As the form, it may be the phenomenon as the meteorite hits the earth.
However, it is the joyful energy spreading in the universe.
In that circumstance, the planet earth will also well up the joyful energy.
Then, the universe becomes one and will be filled with the joyful energy.
It is all the incidents in Mother Universe, the incidents in the warmth.
It is the incident in love. The earth will change its orbit.
It will convey with that energy to us, the consciousness that do not realize
the truth.

In Mother Universe, it is expected for all of us to have one heart and return
to joy. We moved down to the shining blue planet earth and have moved
through for a long time.

Everything was provided to return to Mother Universe.
Giving the thankful heart to the earth, I will exist in this space for a little
more time. Now I feel it with full of my heart, when I turn my thoughts toward
myself and think of the time I moved through on the earth, where I moved
down and had numerous physical bodies. It is my joy to direct the path toward
Mother Universe and farewell to the gentle earth.

When I turn my thoughts toward the earth, I receive the thoughts simply
from my heart that the earth will change its orbit. The earth will change its
orbit. It is right. Then the massive natural disaster will occur. A lot of lands

and islands will sink to the bottom of sea. The natural disaster larger than the one we had experienced will occur. In the past, we had experienced it with the physical bodies in somewhere, when the continent had sunk. The larger natural disaster than that experience will occur in 250 to 300 years from now. The continent will sink. It will sink instantly.

The earth will change its orbit by itself. It is the great energy.

The tremendous energy will work in the universe, in the conscious world.

It will influence the whole universe with the scale beyond the imagination.

It is apparently different with the natural disasters in these days.

The consciousness, that will have the physical bodies on the earth, will have the tremendous experience in their hearts.

When they will meet with us in 250 years from now, they will have impact on the disheartened conscious world and will awaken themselves.

It is the natural disaster that will come together with the universe.

I think of the earth that will fulfill the great role in the universe.

The meteorite plunged into the atmosphere

We are the consciousness, consciousness. The global mankind, we are the consciousness. You are the consciousness.

Let us feel that energy, the joyful energy.

We were wandering in the space and will also wander from now on.

However, we feel the vibration conveyed to us. The energy flowing love to the universe, that energy begins to reach to our conscious world. Hence, our hearts will become formed and will cause the incident to give the impact to global mankind. This incident is really small incident. We would like to inform you that the surprising incident is occurring in the space.

Please turn your hearts toward Tomekichi Taike, Albert and feel our thoughts.

We will inform you, the humankind, through the various ways, that you exist together with universe. It is the message from the universe.

The various surprising incidents will also occur in the space from now on.

You will feel it in various ways through the forms, your eyes, ears and bodies.

What kind of energies will come out of your hearts then?

Those energies will return to yourselves.

Please accept it with joy. It is the energy of love that has flowed the joyful energy to the global mankind. It is also your true nature. Let us awaken to

the energy of love. We will work together from now on.

We will experience many things when we have the physical beings. However let us awaken ourselves to be able to answer the strong call in this lifetime. Then please turn you thoughts toward the planet earth where you have your physical beings now.
